

Let's turn the answers on.

Utah HVAC Contractors

Rocky Mountain Power Home Energy Savings Program

This list of HVAC participating and program qualified contractors in Rocky Mountain Power's Home Energy Savings program is provided **as a convenience only** to our customers.

Important! Changes to the incentives and equipment qualifications associated with the program were approved by the Public Service Commission of Utah and became effective on **September 1, 2010**. The changes can be viewed [here](#). Please visit each incentive offering page for information regarding projects completed before and after the effective date.

ATTENTION CUSTOMERS

All HVAC measures require a "program qualified contractor" who has completed specialized training.

Qualified Contractors have been trained to provide service measures to program specifications for duct sealing and insulation and central air conditioner and heat pump tune-ups. Qualified contractors have agreed to the Home Energy Savings program terms and conditions for participating by signing a participation agreement. Contractors have also agreed to participate in a quality control process.

Please visit homeenergysavings.net/Utah/heatingandcooling.html to review the qualifications for each measure. Incentives are available for a limited time only.
