

Let's turn the answers on.

Important! Changes to the incentives and equipment qualifications associated with the program have been approved by the [Wyoming Public Service Commission](#) and became effective October 1, 2011. The changes can be viewed [here](#). Please review each incentive offering page for information regarding projects completed before or after the effective date.

Below are the qualifications for purchases on or before September 30, 2011.

For purchases on or after October 1, 2011, please go back to the incentive offering Web page.

New Home insulation installed on or before September 30, 2011

New Homes — Builder Incentive

Available Incentives for New Homes

Installed Insulation	Builder Incentive
Attic Insulation	\$0.15/ sq ft
Wall Insulation	\$0.15/ sq ft
Floor Insulation	\$0.1/ sq ft

Qualifications for New Homes

For all insulation projects

- Homes must be built with a **central air conditioner, heat pump or electric heating system** serving 80 percent of the floor area (ducted unitary cooling equipment).
- We recommend insulating to the highest R-value possible. Minimum R-values to qualify for an incentive are: R-48 in the attic, R-24 in the wall, and R-29 in the floor.
- Work performed as part of building code requirements is not eligible for an incentive. Additionally, areas that are not finished or conditioned living spaces (permanently installed heating or ducted cooling), such as a garage or basement, do not qualify
- Incentive application and required documents must be received within 90 days of the completed service

Attic insulation

- Install minimum R-48 or greater

Let's turn the answers on.

Floor insulation

- Install minimum R-29 or greater
- Floor insulation must be installed between conditioned and unconditioned space in order to qualify for incentives (if your basement is ducted for heating/cooling, you do not qualify for floor incentives)

Wall insulation

- Install minimum R-24 or greater
- Only exterior-facing walls qualify
- Basements must be finished or conditioned living space (permanently installed heating or ducted for cooling) in order to qualify for wall insulation

Incentives are subject to tariff approval. Additional terms and conditions may apply.
