Trade Ally's Acceptance of Terms

I hereby certify that all information is accurate including claims of customer and equipment information. I have read all terms on this application and acknowledge that Pacific Power may verify all the information provided. Customer personal information and account number will not be shared with contractors or their representatives. The status of customer incentive applications that are missing required information or were not qualified may be shared only with the contractor or their representatives associated with each individual incentive application.

Home Energy Savings WA HVAC 818 S.W. Third Avenue #215 Portland, OR 97204-2405

Terms & Conditions

When you (the "Customer") participate in these programs, you can save energy and money while reducing your impact on the environment. This application ("Incentive Application") is intended to guide you through the steps necessary to receive an Incentive ("Incentive") under the Home Energy Savings program ("program"). The program is administrated by Portland Energy Conservation, Inc. ("PECI"). The program may require engaging a Qualified Program Contractor ("contractor") in order to qualify for Incentives. Customer is responsible for paying for all contractor services.

Incentive availability: Incentives are available on a first-come, first-served basis according to the postmark date on the application. All services must be purchased and installed prior to submitting an Incentive Application. If required information is not provided within 90 days of application submittal, the Incentive Application will be denied. Incentive will not exceed purchase price. Incentives are subject to tariff approval and may change with 45 days of notice.

Qualifying customers: Residential electric customers residing in the state of Washington who purchase their electricity from Pacific Power on rate schedules 16, 17 or 18 qualify. Landlords who own rental properties served by the company in the state of Washington where the tenant is billed on rate schedules 16, 17 or 18 also qualify for this program. You can find your rate schedule on your bill, by calling toll free 1-888-221-7070 or by logging in at pacific power. Incentive checks will be issued in the name of the customer on the qualifying account. In order to qualify all products and services must be installed at the address where electric services are provided by Pacific Power. Incentives are paid to the account holder for the address where the product or service was installed.

Customer responsibilities: Customer agrees to indemnify and release PECI, and Pacific Power their affiliates, officers and employees from all claims, demands, losses, damages, costs, expenses and liability (legal, contractual or otherwise), which arise from or are in any way connected with any: (I) injury to or death of persons, (2) injury to property of Customer, (3) violation of any applicable laws, statutes or ordinances, or (4) any act omission or negligence of the contractor.

Customer will allow, if requested, a representative from PECI, Pacific Power, or any authorized third party reasonable access to Customer's property for inspections, including but not limited to: (a) post-installation equipment inspection to check implemented measures and to verify compliance with the program

WA CAC 0114 (WA64) Page 4 of 5

Terms & Conditions Continued

requirements; and (b) post-operation inspection to verify energy savings of the measures after a period of operation; and (c) inspection for any other reason. Customer also consents to PECI's use of Customer's name, program services, and resulting energy savings in reports or other documentation.

Customer will obtain the approval of the property owner where the measure is to be installed prior to installation if Customer is not the owner. Customer agrees that information collected in this application may be used for marketing purposes. In addition, Customer acknowledges that information included in this application may be subject to public records requests as required by law.

Customer and PECI shall comply with all applicable laws at all times. It is Customer's responsibility to obtain all licenses, permits or other approvals required for installation of products or measures under the program. Customer is solely responsible for proper disposal of any and all removed products.

Customer is solely responsible for the economic and technical feasibility, operational capability and reliability of Customer's installations, products and solutions. PECI and Pacific Power make no representation or warranty and assume no liability with respect to services of any contractor, quality, safety, performance or other aspect of any design, system or appliance installed pursuant to the program or this Incentive Application and expressly disclaim any such representation, warranty or liability. Under no circumstances shall PECI or Pacific Power be liable for any monetary damages related to the program including any action or inaction of contractor's performing work under the program. All projected savings are intended to be estimates and PECI and Pacific Power do not guarantee any level of savings.

The customer hereby transfers to Pacific Power all "Environmental Attributes" attributes to the Qualifying Equipment or its operation. Environmental Attributes include any and all credits, benefits, emissions reductions, offsets and allowances, howsoever entitled, resulting from the avoidance of the emission of any substance to the air, soil or water at or by PacifiCorp generating facilities through reduced generation of energy or other savings or offsets on account of the Qualifying Equipment.

The customer will not claim ownership of any Environmental Attributes. As long as the customer at the same time states the Qualifying Equipment was made possible with funding from Pacific Power, the customer may claim that it is facilitating the production of the Environmental Attributes attributable to the Qualifying Equipment.

Jury waiver: To the fullest extent permitted by law, each of the parties hereto waives any right it may have to a trial by jury in respect of litigation directly or indirectly arising out of, under or in connection with this agreement. Each party further waives any right to consolidate any action in which a jury trial has been waived with any other action in which a jury trial cannot be or has not been waived.

Application timeline: Incentive Application and required documents must be postmarked within 90 days of work completed date. Incentive checks are issued within 45 days of receipt of the completed and approved Incentive Application.

Application details: If your application is selected for inspection, it will not be processed until the review is satisfactorily completed. Pacific Power issues incentives in the form of checks not utility bill credits. Pacific Power is not responsible if your contractor provides inaccurate information about the amount and/or conditions of the actual incentive and Pacific Power will not pay incentives for equipment that is mislabeled or is represented by contractors regarding incentive qualifications. Households receiving incentives under the Home Energy Savings program may not receive equipment purchase and installation incentives under other Pacific Power company programs.

By providing Pacific Power with your e-mail address you agree that we may send you e-mails, occasional "breaking news" alerts and promotions from Pacific Power's Home Energy Savings program. We may also e-mail you occasionally with updates and information about the program. Should we elect to change our privacy policy we will post the changes at pacificpower.net/hes. Where the changes are significant, we may also choose to e-mail all our registered users with the new policy details.

Additional terms and conditions may apply.
