Definitions for Ceiling Fans Product Listing Column Headers

Product Type: Ceiling fan only (no light kit) or ceiling fan with light kit.

Brand Name, Model Name, and Model Number: This is how a particular ceiling fan is identified. Model numbers often contain wildcard characters, such as *, #, and X, that are placeholders for non-energy attributes, such as finish color.

Retailer/SKU: In addition to model numbers, manufacturers and retailers often use a retail number to identify products or packaging configurations. It is commonly a five (5) or six (6) digit number located on the front of the packaging or near the UPC code. This information provides the item number used by specific retailers or provides additional product numbers of multi-packs of the original qualified product (e.g. - AM09 (4-pack)).

Ceiling Fan Size: The diameter (in inches) of a ceiling fan tip to tip.

Efficiency: Residential ceiling fan airflow efficiency is defined as cubic feet per minute (CFM) of air moved per watt of air moved per watt of power consumed by the motor and controls (and light kit, if sold with the fan). Efficiency is measured on each of three fan speeds (low, medium, high) and must meet the minimum requirements outlined in the "Air Flow Efficiency Requirement" table on the "Key Efficiency Criteria" tab. ENERGY STAR also requires a minimum airflow at each of the three speeds to ensure that airflow performance is not sacrificed for reductions in energy use.

Ceiling Fan Warranties: Qualifying ceiling fan models must come with a minimum 30-year motor warranty; one-year component(s) warranty; and 2-year light kits warranty.

Key Efficiency Criteria

Qualified models meet all ENERGY STAR requirements as listed in the Version 3.0 ENERGY STAR Program Requirements for Ceiling Fans that are effective as of April 1, 2012.

Air Flow Efficiency Requirement		
Fan Speed	Efficiency Requirement	Efficiency Requirement
Low	1,250 CFM	155 CFM/Watt
Medium	3,000 CFM	100 CFM/Watt
High	5,000 CFM	75 CFM/Watt

Notes:

Qualifying ceiling fan models must come with a minimum 30-year motor warranty; one-year component(s) warranty; and 2-year light kits warranty.

Residential ceiling fan airflow efficiency is defined on a performance basis: CFM of airflow per watt of power consumed by the motor and controls. The motor, blades, and controls are treated as a system, which allows for multiple approaches to reach a given efficiency level. Efficiency is measured on each of three fan speeds (low, medium, high) and must meet the minimum requirements outlined in the table above.
