Changes to wattsmart Homes Program in Utah

On December 1, 2016 Rocky Mountain Power (the “Company”) received approval in Docket No. 16-035-T13 to shift Heating, Ventilation, and Air Conditioning measures to a Mid-Market channel within the *wattsmart* Homes Program. Evaporative cooler offerings will be offered through the Mid-Market channel beginning April 17, 2017, with incentive levels being lowered for the following:

	Current Offered Incentive (post-purchase application)	Proposed Offered Incentive (point of purchase instant incentive)
Evaporative Coolers	Incentive per unit	Incentive per unit
Evaporative Cooler \geq 2500 CFM Portable	\$200	\$100
Evaporative Cooler \geq 3500 CFM First Time Install	Non-Self Install \$500	\$175
	Self-Install \$400	
Evaporative Cooler \geq 3500 CFM Replacement	Non-Self Install \$500	\$175
	Self-Install \$400	
Evaporative Cooler \geq 3500 CFM Premium	Non-Self Install \$650	\$175
	Self-Install \$500	

It is the Company’s intent to make ongoing adjustments to the incentives for certain measures in response to market conditions (changes in material costs, product availability, price competition, etc.), and stay in alignment with the Company’s defined savings targets, incentive budget, and cost-effectiveness requirements.
